We're It.

ADVANTAGES

• Preferred Response Time

When it is most important, requests will be prioritized

• Discount on Labor

Enjoy a 20% savings on labor costs

• Bundled Services

Simplify invoicing with the ease of one vendor

• Code Compliance

Never wonder or worry if systems are compliant

• Web Portal Access

Easily access reports, repair notes, invoices and more with our comprehensive customer account portal

VALUE ADDED SERVICE PLANS

PFX-TEND™- All-Inclusive Fire Extinguisher Service

Our portable fire extinguisher extended-service plan, designed for customers who want fixed-budget maintenance costs while maintaining a consistently high level of fire protection. The program includes annual inspection, recharges at the time of inspection, 6-year maintenances, hydrostatic testing, parts and labor. Also included in this program at no additional charge - extinguisher mounting, extinguisher loaner service, and ePLACE™ electronic placement reports.

ePlace™- Electronic Equipment Reporting

Compliance with codes and standards can be challenging, particularly as the customer's inventory of fire protection equipment increases. To help ease this burden, we offer ePlace™ our web-based equipment placement report, which details the location and pertinent service data for all of your life safety equipment – at your fingertips. Never lose another inspection report again. And, having ePlace™ will aid with managing your life safety assets and with budgeting maintenance costs for future years.

Nozzle Plan Plus™ - Commercial Cooking System Maintenance

Clogged nozzles and missing protective caps are deficiencies which result in a "non-compliant" inspection report and a subsequent service charge to affect repairs. With Nozzle Plan Plus™ we will provide full maintenance on your nozzles at the time of inspection(s), including the cleaning, repair and/or replacement of all nozzles, protective caps and seals, and all labor charges for one flat fee per year -- no hidden costs, no surprises.

Parts Protection Plus™

Under Parts Protection Plus, we will repair or replace malfunctioning control panels, field power supplies, remote annunciators, digital communicators, and field peripheral devices, (i.e., smoke detectors, heat detectors, duct smoke detectors, manual pull stations, addressable modules, bells, horns, strobes and field relays), with a component of like kind and quality as the original.*

Rapid Repair™ - Same Day Deficiency Correction

System impairments and deficiencies inhibit the proper operation of your life-safety equipment and can delay your system from being certified compliant with applicable codes and standards. Under the Rapid Repair™ program, select impairments will be corrected at the time of your inspection -- for just the cost of the parts -- no additional charge for labor. Rapid Repair™ includes most batteries, gauges, and flexible hose replacements, missing protective caps and informational signage. Save hundreds of dollars on the cost of a deficiency repair and avoid the delay in certifying your system.
