DETECTION & ALARM SYSTEMS

BUY TIME AND SAVE LIVES

DESIGN

DO YOU KNOW WHICH DETECTION SYSTEM IS BEST SUITED FOR YOUR BUILDING? WE DO!

Not all building environments are created equal when it comes to designing and implementing fire detection systems. Commercial buildings present a variety of fire detection challenges - enter Keystone. We use devices from our most trusted brand – Notifier by Honeywell – to protect our clients and their property.

INSTALL

COMPLETE FIRE PROTECTION

Protecting People & Property for more than 60 Years

Fire Alarms by Notifier™

Early fire detection is critical to life safety — and to property, too. Fire alarm systems from Notifier™ by Honeywell respond rapidly and precisely to incipient fire signatures. At the same time, they reduce the incidence of nuisance alarms significantly.

Wireless Detection Systems

Wireless detection eliminates the need for hardwired connections. The ease of wireless installation minimizes disruptions to customers' operations, reducing downtime and saving costly labor.

Air Sampling Systems

VESDA by Honeywell is an aspirating smoke detection (ASD) system used for early warning applications where response to a fire is critical.

Gas & CO Detectors

Dangerous gases can lead to fires, sudden explosions, and asphyxiation. We protect workplaces and property from gases that are often odorless and colorless — and therefore undetectable by people.
